

901154

PRODUCT SUMMARY

ConcealFab's 5G Modular Shroud is part of our flagship 5G product line. This dual cone design conceals the heat sink and cables for Ericsson's 6701 or 6705 mmWave radios. This shroud includes our trademarked clearWave™ material, which is color-matched to provide seamless color from the concealment to the radio. It also replaces the need for applying mmWave vinyl wrap to the front of the radio and simplifies radio maintenance.

Developed for the Los Angeles market.
